

# 02-7 Vehicle Fleet

---

By Nicole, Nallu, Benjamin, Colleen,  
Jason, Joe, and Michelle

# Need and Approach

---

- The stakeholder for this project is TCNJ who can use this project to assist in managing the vehicle fleet of the college
- Maintaining an expansive vehicle fleet is costly in terms of economic and environmental cost
- In order to obtain the composition that provides the least cost, we provide an application where one can clearly view relevant information
- Our project allows users to view all relevant information pertaining to each vehicle in a clearly formatted table

# Costs and Benefits

---

- Separate new website
- build\_db and insert\_db files create and populate the database making it so the user does not have to spend the time and effort doing this
- Climate change has become a huge concern for our world and this change can impact the world and the society in so many negative ways
- It is important for the campus and us as individuals to focus on the sustainability aspect that can prevent us from warming our planet
